SUMMARY

Full-Stack Software Engineer and student at **1337 School (42 Network)**, specializing in Node.js, C++, Python and DevOps. Proven experience architecting secure integrations and AI-driven applications, with a track record of building scalable backends and high-performance frontends.

TECHNICAL SKILLS

Languages: C/C++, Python, TypeScript, JavaScript (ES6+), Node.js, SQL, HTML/CSS
Frameworks/Libraries: React.js, Fastify, Express, TailwindCSS, OpenAI API (GenAI)
Developer Tools: Git, Docker, Docker Compose, Nginx, Postman, Linux/Unix
Databases & Networking: PostgreSQL, MariaDB, SQLite, WebSockets, HTTP/HTTPS, JWT
Languages Spoken: English (Advanced), Arabic (Native), French (Intermediate)

EXPERIENCE

Brandiha

Full-Stack Developer Intern

Agadir, Morocco

Feb 2026 – Jun 2026

- Developed and maintained a SaaS platform for eCommerce operations, integrating **Shopify**, **WooCommerce**, and **YouCan** to centralize order management workflows.
- Built a custom **WordPress plugin** enabling landing-page businesses to automatically transmit customer orders to the platform through external APIs, eliminating disconnected sales channels.
- Implemented features for **order processing**, **shipping workflows**, **delivery ticket generation**, and **operational automation**, improving merchant workflow efficiency.
- Integrated **Google OAuth** authentication to provide secure user login and account connectivity across the platform.
- Refactored frontend architecture using reusable **React components** and **custom hooks**, reducing code duplication by **25%** and improving maintainability.
- Enhanced platform reliability by implementing API logging, improving error tracking, and optimizing integrations with external services.
- Collaborated with the development team to fix production issues, improve application performance, and deliver new features for eCommerce merchants.

PROJECTS

PriceIt | *React, Node.js, Express, PostgreSQL, GenAI*

Nov 2025 – Present

- Built an **AI-powered pricing platform** that lets users upload a product and instantly receive a real market price estimate, broken down into minimum, medium, and higher price ranges.
- Leveraged **GenAI** to analyze product data and generate actionable pricing suggestions, helping users price competitively based on real market conditions.

Real-Time Multiplayer Game | *Fastify, WebSocket, React, SQLite*

Sep 2025 – Nov 2025

- Developed a high-performance gaming platform using **WebSockets** for real-time, bi-directional communication with minimal latency.
- Built an automated tournament engine with live scoring and dynamic player ranking updates.

Inception (Infrastructure) | *Docker, Nginx, MariaDB, System Admin*

Jun 2025 – Jul 2025

- Orchestrated a containerized microservices environment using **Docker Compose**, ensuring 100% dev-to-prod environment parity.
- Optimized **Nginx** configurations and multi-stage Docker builds to reduce image sizes and enhance deployment speed.

EDUCATION

UM6P – 1337 School (42 Network)

Architect in Digital Technologies

Groupe Scolaire Zghari

Baccalaureate in Physics

Ben Guerir, Morocco

2023 – Present

Tiflet, Morocco

2019 – 2022
